DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-43, drawn to methods of treatment, classified in class 424, subclass 85.4.
- II. Claims 44-53, drawn to drug screens, classified in class 435, subclass 6.
- III. Claims 54-58, drawn to polynucleotides and means of expression, classified in class 435, subclasses 69.1, 320.1, and 325, and class 536, subclass 23.5.
- IV. Claims 59-61, drawn to modulators of the hypocretin system, classified in class 530, subclass 351.

The inventions are distinct, each from the other because of the following reasons:

The methods of Invention I are distinct from those of Invention II because they have different goals, require different reagents, and have different method steps.

The methods of Invention I are not related to the polynucleotides of Invention III. The polynucleotides cannot be used in the methods.

The methods of Invention I are distinct from the modulators of Invention IV because the modulators have other uses, such as the treatment of cancer and viral disease.

The methods of Invention II are distinct from the polynucleotides of Invention III because the polynucleotides have different uses, such as the hybridization assays.

The methods of Invention II are distinct from the modulators of Invention IV because the modulators can be identified in other ways, such as by antiviral assays.

Art Unit: 1646

The polynucleotides of Invention III are not related to the modulators of Invention IV. They differ structurally and functionally, cannot be used together or interchangeably, and have non-coextensive searches and considerations.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the searches required for the different groups are different, restriction for examination purposes as indicated is proper.

This application contains claims directed to the following patentably distinct species of the claimed invention:

For Group I, the species are:

Age-related disorders

Jet lag

Narcolepsy

Insomnia

Mood disorder

Chronic fatigue syndrome

Attention deficit disorder

Neuronal degeneration

Nausea

Irritable bowel syndrome

Incontinence

Pain

If Invention I is elected, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1-9 and 25-35 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 1646

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
